

DP WORLD

**London
Gateway**

**Senior Technical Manager
London Gateway, Stanford-Le-Hope, Essex, UK**

DP World is one of the largest marine terminal operators in the World with 49 terminals across 31 countries. Our dedicated, experienced and professional team of nearly 30,000 people serve customers in some of the most dynamic economies across the World.

London Gateway

London Gateway will be the UK's first 21st Century major deep-sea container port and one of Europe's largest logistics parks offering over 9million square feet of logistics space. Situated on the north bank of the River Thames in Thurrock, Essex, the £1.5 billion development will provide the UK with a new world class infrastructure asset and a brand new gateway to global trade.

London Gateway's deep sea port will be the most fully automated and efficient in the country, adding an additional 3.5million TEU (standard twenty foot equivalent cargo units containers) to the nation's port capacity. The port will become a national trading hub for the UK and will accommodate the world's largest container ships, which have substantially increased in size over the past decade.

In addition to a major deep sea port, London Gateway will provide one of Europe's largest logistics parks, which will offer individual distribution centres in excess of one million square feet.

About the Role

This position reports to the Director of Civil Engineering and the main purpose of the role is to ensure the entire infrastructure works are delivered on time, to budget and to the technical requirements required. To ensure the required works are completed in accordance with our commitments. To ensure that appropriate standards are adopted in the various elements of the works. To assist the Implementation Director in negotiating legal agreements and ensuring they are implemented and to oversee reporting to banks and ensure all requests are dealt with in a timely means.

The key objectives of the role will include:-

- To assist in the smooth running of the Engineering Team.
- To provide appropriate guidance, background and support for the Engineering Team to meet the Project needs.

Key responsibilities will be to:

- To ensure work packages are completed on time or, should delays occur, all reasonable actions are taken to minimise the effect of such delays.
- To ensure work packages are completed on budget and should overruns be foreseen, all reasonable actions are taken to minimise the effect of cost overruns.
- Responsibilities cover highways and roads, services, buildings and railways.
- To interact and challenge the discipline managers overseeing particular elements of the work
